

# DIN Patchcord

## Description:

The one piece DIN connectors feature a single unit body with spring-loaded free-floating zirconia ceramic ferrule. This unique connector offers superior performance in a compact, DIN 47256 compatible design suitable for a variety of applications. The DIN connectors are manufactured with a precision screw machined brass for consistent performance and durability.

The DIN connectors are available in either single or multimode and are fully intermateable with DIN 47256 type products. Both the singlemode and the multimode connectors use a zirconia ceramic ferrule featuring a pre-polished "PC" profile with an enhanced convex spherical end. This allows fast polishing of the fiber and enables the installer to achieve low optical loss with high performance physical contact and ensuring maximum repeatability.

## Features:

- Anti-rotation key
- Adjustable in 60° steps
- Spring loaded zirconia ceramic ferrule
- Special ferrule preform for short polishing time
- Axially suspended

## Application:

- Telecom
- MAN, CATV, sensor systems
- Measuring techniques
- Utilities, railways

## Specifications:

Insertion loss singlemode (9/125)	0.25 dB (typ.)
Return loss APC	> 60 dB
Insertion loss multimode (G50, G62.5/125)	0.20 dB (typ.)
Strain relief	crimped, 100 N (conditioned by type of cable)
Operating temperature	-40° to +85°C (conditioned by type of cable)
Durability	min. 1000 cycles
Assembly procedure	glue and polish
Connection	physical contact of ferrules
Lock mechanism	screw thread
Standards	according to CECC 86135-801/-802
